Press release

Neukirchen-Vluyn, April 11, 2018

Chinaplas: SCHWING Technologies is showing Green Cleaning Solutions Thermal cleaning specialist at plastics and rubber fair in Shanghai, China

This year, SCHWING Technologies will again exhibit at Chinaplas 2018, the leading Asian trade fair in plastics and rubber in Shanghai, China from April 24-27, 2018. The expert from SCHWING, Virgilio Perez Guembe will be present at booth K43 in hall 2 to inform visitors about green, energy-efficient cost-lowering systems in thermal cleaning of tools and metal parts.

The German plant manufacturer is an internationally successful specialist in removing polymers with its "Green Cleaning Solutions". Since 1969 the expert company offers intelligent and reliable systems for any metal parts and tools in the plastics industry. SCHWING clients have the advantage of significantly shorter machine downtimes and the recognizably higher service lives of residue-free cleaned tools and machine parts.

SCHWING Technologies

SCHWING Technologies has been operating since 1969 and is the worldwide technological leader for high-temperature systems for thermal cleaning, thermo-chemical finishing and heat treatment of metal parts and tools. The owner-managed company constructs, manufactures and operates its systems at its headquarters in Neukirchen-Vluyn in Germany's Lower Rhine region. Built upon the achievements of German engineering, the medium-sized business is globally the best-known specialist in the removal of plastics. Among its around 2,500 international clients are companies from the plastics and fiber industries, as well as from the chemicals and automobile sectors. With its 80-strong personnel, the company is equipped with the tools and systems for any cleaning need and delivers the best economy, ecology and quality. SCHWING is also a reliable service partner for contract cleaning by cleaning more than 250,000 tools and parts each year to the highest environmental and qualitative standards. In the words of Ewald and Thomas Schwing, the two managing directors at SCHWING Technologies GmbH, "So far, there has not been a single component that we have not been able to free from polymers and inorganic contaminants."
