About Global Automated Liquid Handling Market Analysis

The Global Automated Liquid Handling Market size is expected to reach \$1.05 billion by 2024, rising at a market growth of 7.8% CAGR during the forecast period.

Automated liquid handling (ALH) are a set of instruments and equipment, used in handling liquids and execute various functions pertaining to liquid transfer within a clinical and research environment.

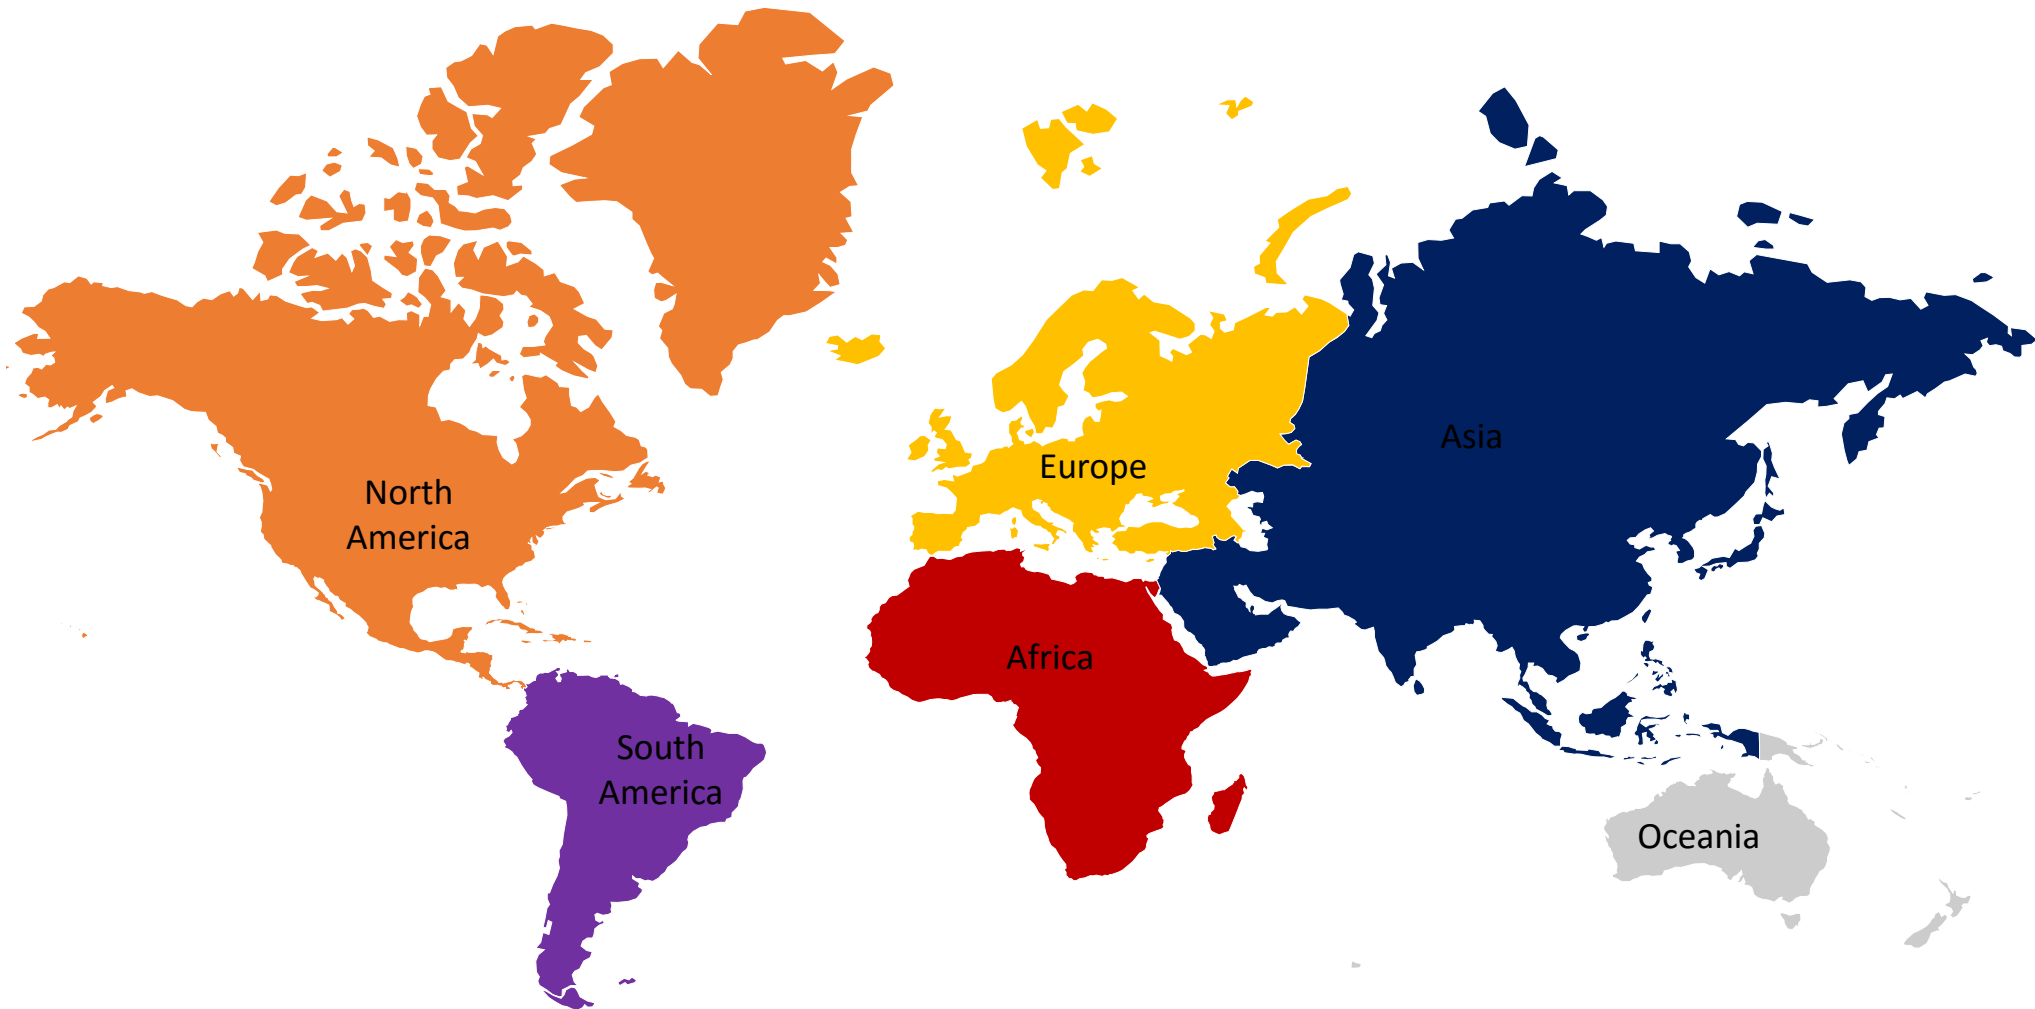

ALH systems have contributed to the streamlining of research workflows which has led to limiting the manual effort required in liquid transfer operations.

Manual intervention into research is prone to errors and is not reproducible, creating additional bottlenecks within the overall research experiment, when experiments are not satisfactorily reproduced.
