# About Network Security Firewall Market

The Global Network Security Firewall Market size is expected to reach \$6 billion by 2024, rising at a market growth of 12.3% CAGR during the forecast period.

Network security firewall is a security system created for preventing unauthorized access to private information existing on a network. The firewall can be used as software as well as hardware and can isolate a specific network and its data from an outer network in order to keep that network's data private.

There are several advantages that come with the implementation of a firewall in a network, especially the easy installation and the high speed. Utilization a firewall for a network is relatively less costly than securing each computer individually.

Based on Component, the market is segmented into Solutions and Services. Solutions is further bifurcated into SMS Firewall and Signaling Firewall.
