

EASY

No software to install

It's that simple

Finally, backup for everyone

Introducing the World's first Automatic Backup on an external hard drive. Clickfree™ Automatic Backup requires no software installation or configuring, all of the intelligence is in the device. Take the Clickfree™ device right from the box, plug it into the PC and backup begins automatically. It's that simple!

Clickfree™ Automatic Backup is a breakthrough in simplicity and convenience for consumers or small business backup – now all PC users can perform backup.

How it works:

Once connected to your PC, the Clickfree™ backup software begins automatically searching for over 350 different file types and copies them onto the device.

Remove from box
and plug into PC.

Backup starts automatically
No software to install.

Unplug from computer.
Your backup is complete!

Multiple PC backup - all on one device

Family or small office backup has never been this simple. Clickfree™ Automatic Backup can backup up to 10 computers - all with the same "just plug it in" simplicity. Each PC can have individual backup options and each computers' data is presented separately.

Advanced features for advanced users

For power users, Clickfree™ Automatic Backup includes customizable options, giving users full control over their backup. Users can target specific folders or add custom file extensions. Even after the settings have been changed, the backup will still run without any installation or setup.

*One gigabyte, or GB, equals one billion bytes when referring to hard drive capacity. The computers' operating system uses a different standard of measurement and may report a lower capacity. Some of the listed capacity is used for formatting and other functions and is thus not available for storage.
