## The State of the Internet Report

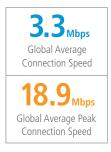

EMEA HIGHLIGHTS - SECOND QUARTER, 2013

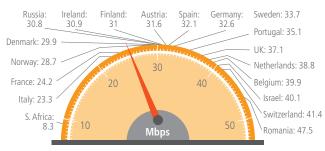

## **INTERNET & BROADBAND ADOPTION**

In the second quarter, the global average connection speed increased 5.2% to 3.3 Mbps, and the global average peak connection speed increased 0.1% to 18.9 Mbps. Across countries in EMEA, quarterly changes across both metrics were generally positive.

**Average Connection Speeds, EMEA** 

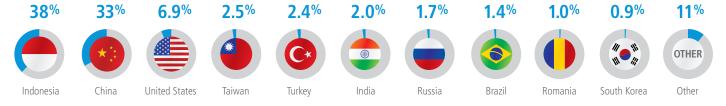

Average Peak Connection Speeds, EMEA

## **SECURITY: ATTACK TRAFFIC**

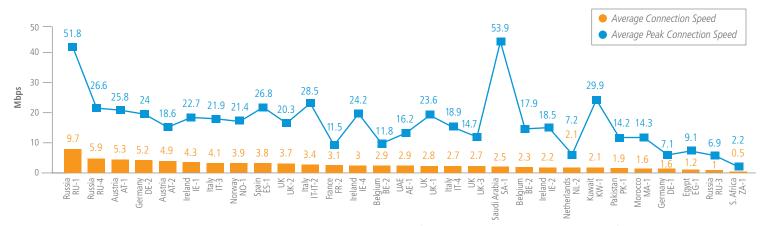

Just over 10% of observed attack traffic originated in North and South America, just over 10% originated in Europe, and over 78% originated in the Asia Pacific/Oceania region. Africa was responsible for just three-tenths of a percent.

The blue areas represent each country's percentage of the overall total amount of attack traffic observed by Akamai.

## **MOBILE CONNECTIVITY**

Mobile provider RU-1 had the highest average connection speed at 9.7 Mbps, while ZA-1 had the lowest at 0.5 Mbps. Mobile provider SA-1 had the highest average peak connection speed at 53.9 Mbps, while ZA-1 had the lowest at 2.2 Mbps.

NOTE: The average and average peak connection speeds presented above are based on end-user connections from those mobile networks to the Akamai Intelligent Platform, and are not necessarily representative of a single provider's full set of service offerings or capabilities.
